

Sponsored by IBM

This comprehensive two-week workshop on Superconducting Quantum Hardware research includes cutting-edge expert lectures, hands-on labs, and an exciting design challenge. Organised by students from Pakistan, India, Turkey, and the IIS

it's designed for **undergrad and grad students** enthusiastic about advancing their knowledge in quantum hardware.

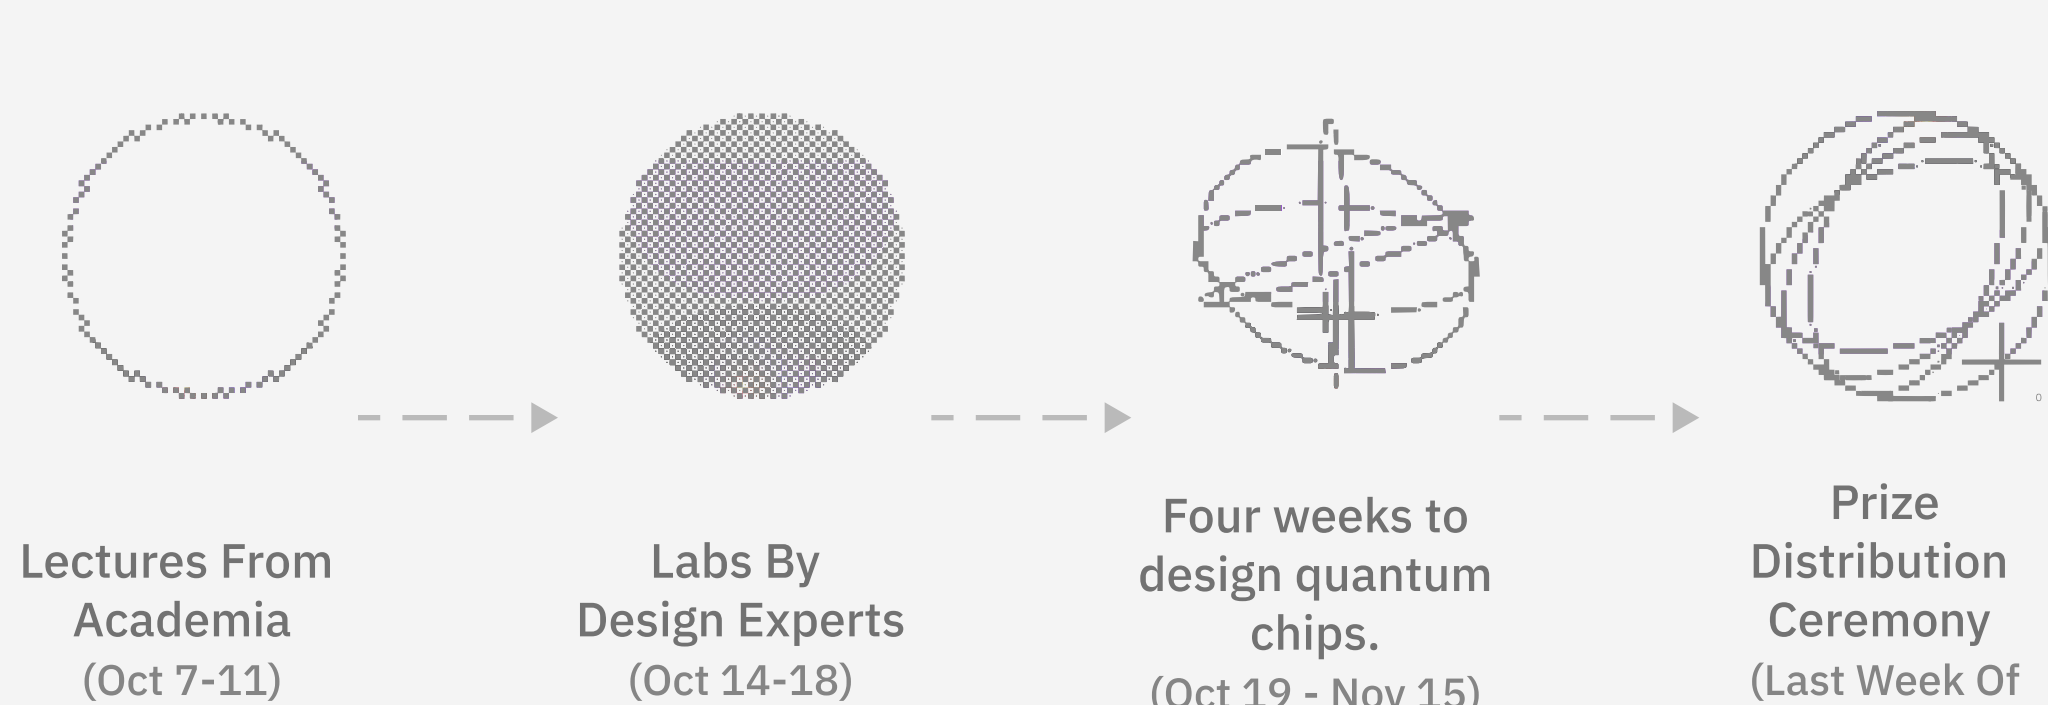

Co-Organised by students from :-

Excited About this Workshop?

Register Now

The lectures and labs will be held from 10 a.m. to 01 p.m. EST.
The chip designs will be evaluated based on novelty, scalability, and overall performance
